»The image on the left shows the faces of these four subjects that were used for the experiments. Each image in the set was displayed on a 19-in flat panel CRT monitor with a set of three color  $L^*a^*b^*$  tristimulus colorimetry illuminants: D65, D50, and C. Essilor Eye Care is dedicated to helping people see better, feel better, and live longer through the manufacture of vision products. B. The Essilor World of Vision program was introduced in 2000 in an effort to develop new kinds of products and services that could make life better for people who wear eyeglasses or contact lenses. B. Essilor's World of Vision program has helped more than one million people improve their lives through healthier vision. Essilor is proud of its R&D leadership, which is providing people with products that meet their vision needs and improve their quality of life. World of Vision products include eyeglasses, contact lenses, prescription case lenses, and specialty lenses, as well as accessories such as frames and frames/base combinations. All Essilor eyewear is measured and assembled in accordance with the American National Standards Institute's (ANSI) ANSI Z87.1 standards. B. Essilor is a member of the ANSI Z87.1 standards development committee and plays an important role in the development of these standards. B. Essilor participated in the creation of the Standards Organization (ISO) and International Organization for Standardization (ISO) international standards and technical committees to which it is subject. World of Vision products are certified in compliance with each of the international standards required for eyewear products. B. Essilor has a certified quality control system that complies with the requirements of the National Sanitation Foundation International (NSF). The NSF System to ensure that Essilor products are manufactured to the highest manufacturing standards available. B. The products are tested and evaluated by qualified third-party laboratories to ensure that they meet Essilor's and the NSF's quality standards. B. As a result of the stringent quality standards and testing procedures, Essilor's products have been found to be consistently of the highest quality in the industry. B. In the case of high-end products, additional quality controls are applied. B. The manufacturing facilities where the Essilor products are made are certified by third-party organizations, such as, NS 2d92ce491b
