1. How to Install: The zip file can be extracted. A folder "Macro" is created inside "Evernote", "Documents" or wherever you like to save it. In this folder is a file "keymacro.swf". Copy the file to your desktop or anywhere you like. You can delete the file if you do not want to use this utility any more. 2. Requirements: Evernote (or any other application capable to run in browser) 3. How to use: In order to make macros work properly, you need to have the following browsers: IE 7+ or Firefox 3+ with "Macromedia Flash" plugin installed. Place a tab for one-time notes (of any type). Double click the tab to get the text area and the bold and colored text. You can change colors, fonts and other parameters in the "Macro" window. To create a link to a web site press CTRL+G. The name and address is displayed in the text area. For each action the browser makes, the name is removed from the text area. So as long as you are pressing the CTRL key, the name of the web site appears in the text area. To close the tab press ESC key. You can also use right mouse button to add icons to the tab. Press the CTRL key and right mouse button at the same time. For example, you can add an URL from "HOTMAIL" and at the same time have it displayed in the text area. You can create multiple tabs. Just repeat the above steps for each tab. You can also attach them to the evernote account. 3.1 For attaching them to the evernote account, enter the tab name and evernote account password into the "User Name" and "Password" fields in the "Macro" window. "Attach to evernote" button will be activated. 3.2 To delete a tab, press ESC key. 4.1

Text formatting: Use these buttons to change the text formatting: Double click the text to change font. Press the Home key to change font size. Press the End key to change font size. Press the Down arrow key to decrease the font size. Press the Up arrow key to increase the font size. Press the CTRL+L to change font color. Press the CTRL+P to change text color. Press the CTRL+
