it from deleting the crack files. Q: A function which is continuous, bounded and linear is actually a linear operator. I am interested in the following result : If $f: X \rightarrow Y$ is a bounded, continuous linear function, then f is actually a linear function. Actually this is just a small part of my problem and I have no idea how to start to attack it. For any bounded function $f: X \rightarrow Y$, we can choose a sequence of continuous linear functions $\{f_n\}$ that converges to f . Now, since every bounded function is continuous, $\lim_n f_n = f$. However, this doesn't help much. How to show f is linear? A: If $y \in Y$, then $f(x+x_0) = f(x) + f(x_0)$. South Carolina Highway 841 South Carolina Highway 841 (SC 841) is a primary state highway in the U.S. state of South Carolina. It runs from U.S. Route 52 (US 52) to the North Carolina state line, at which point the highway continues as North Carolina Highway 101. Route description SC 841 begins at an intersection with US 52 (Spartanburg Highway) in the Spartanburg city limits, heading east on East Seventh Street. Traveling through the eastern portion of the city,
