The work is original but may be inspired by a photograph or a piece of literature. Please browse through the available artworks below. Click on an image to make it appear bigger, to set it as your wallpaper or to email a high resolution copy to yourself. Norman is our experienced artist. He uses a wide range of media to bring his artworks to life. He believes that art should be subtle and thought provoking and his style is influenced by impressionism and expressionism. He has worked for a variety of magazines and newspapers and is now offering his art in print format through the use of high resolution artworks. Norman's artistic style is often characterised by deep shadows, shapes, lines and geometric patterns. Norman is not only a talented artist, but also a dedicated conservationist. With his daughter, he has created a website, Bloomsbury and Heresies, that includes background on the illegal trade in wild plants and flowers. The website is aimed at the general public, with particular focus on gardeners. In the UK, many endangered plants are protected by a law that makes it an offence to collect or possess them without a permit, even in the case of a hobbyist. The website includes a page of plant specimen information. This information will help gardeners and others interested in nature conservation.

But The European Union has been making slow and steady progress towards moving towards a single unified digital currency called the "Euro Coin". On Tuesday, it held a meeting in Brussels, where it announced that as of January 2017, the majority of banks in EU-member states will be able to "demonstrate the technical capability to operate a fiat currency clearing and settlement infrastructure which can be used to settle payments for both domestic and cross-border payments in euros." In doing so, the EU is trying to reduce the blockades and issues that often arise when money moves around the world. "To this end, the European Payments Council and the European Banking Authority will work together to develop a specification to standardise this market infrastructure," the EU said. "An additional role will be played by the European Banking Federation, the European Banking Authority and the European Payments Council." The initiative is expected to have a profound effect on the way the EU operates: it is designed to help expand the Euro Coin across the continent. "The central objective of the EPC is to complete the banking union in order to support the single market and serve as a real European monetary policy tool," the statement continued. "Further work will focus on the development of a standard for the payment settlement infrastructure." The move is part of the EU's broader "Digital Agenda", which hopes to streamline and modernise European business in an increasingly digital world. While the "Digital Single Market" initiative has had some early success in the EU, the recent scandal surrounding the Libor rate-fixing scandal has highlighted the need for greater oversight of the financial sector in the EU. However, the EU's broader ambitions for the Euro Coin are more ambitious than many would expect, and include the ability for European citizens to use the digital currency just like any other. "The euro coin will also be used to settle transactions in the euro zone and is expected to 2d92ce491b
