

KeyMacro is a fully-featured and easy to use utility that allows you to assign hotkeys to all the commands available in your most used editors and applications. KeyMacro lets you assign the hotkeys to the editing modes available in the most common text editors, like: * Fix spelling and grammar * Find next typo * Go to the next or previous line * Write or update a comment * Go to a different folder * Search in the current or a specific file * Select or deselect all * Turn on or off in-line help and documentation * To browse or add a file * Undo or redo changes * Copy or paste content * Save the document * Close or exit the application * Edit and customize the hotkey bindings KeyMacro can be used on your personal computer or on a workgroup, where the whole staff can use it without any hassle. KeyMacro is so much more than just a key mapper! It can also connect to a web server to store your hotkeys for any type of supported application (and more is coming). Some of the supported applications include: * Edit * Notepad * Dreamweaver * Notepad++ * Visual Studio * NotePad++ * Gedit * Sublime Text * Sublime Text 2 * Vim * Emacs * Atom * Brackets * PhpStorm * Notepad.exe KeyMacro can assign the hotkeys to every command in your text editor in a way that you can customize and change without ever having to restart your computer. When you launch KeyMacro for the first time it will generate the XML configuration file, which includes all the hotkeys and their assigned application. In a few seconds, KeyMacro can configure your computer and start creating a user-friendly interface for your keyboard. KeyMacro is a FREE software! Hotkeys (hotkeys) is a powerful app for Windows that lets you assign and edit hotkeys for a multitude of editors, operating systems, and programs. Keyboard shortcuts can save time, be more productive, and increase your confidence in your work. With Hotkeys (hotkeys) you can map custom keys to use programs, documents, and other software easily. Hotkeys (hotkeys) also lets you choose and use a custom set of hotkeys for a specific application, program, document, or text editor. Hot

What's New In?

VietPad is a straightforward and practical application designed for those who want to create documents in both English and Vietnamese with ease. The tool supports special characters (diacritics) and entry methods, such as VNI, VIQR and Telex, without the need of other external tools like keyboard drivers. Create and alter multiple records using an user-friendly interface The program comes packed in a small archive with all the necessary files, which can be copied to an external drive and run from any computer. VietPad comes with SmartMark function, which lets you enter diacritical marks at the end of words. In order for the tool to start, you need to have Java installed on the hard drive or at least updated. It's wrapped in a well-structured and accessible layout that provides a few custom themes to choose from, a simple editor and a standard toolbar packed with the most common commands, like undo, search and spell check. At the bottom of the window, you can view the interface language that can be easily changed and the input method. Customize the content, switch between input modes and check the text for mistakes To create a new file, simply start typing your thoughts or use the copy, cut and paste elements to quickly enter content from another document. To fix mistakes, you can use the undo and redo actions to go back to the previous text. Unfortunately, only the date and time can be inserted, as VietPad doesn't offer an option to add images, tables or choose a specific paragraph alignment. It's possible to pick particular font types, sizes and colors, enable word wrap, remove line breaks and change the case (e.g. lowercase, uppercase, titlecase). You can easily switch between English and Vietnamese keyboard mode, select the input method and disable SmartMark. The tools menu comes with a spellchecker, text conversion to Unicode and VIQR, as well as add, strip and normalize diacritics. A few last words The bottom line is that VietPad is a reliable application that to help those who need a simple yet feature-rich editor to write and edit various documents in both English and Vietnamese and easily choose the keyboard mode. VietPad is a straightforward and practical application designed for those who want to create documents in both English and Vietnamese with ease.
