

Vx 64 Vocal Strip Vst 1.0.0

one of the latest effects plugins for vocal processing . The presented plugin contains various MIDI-based effects, plus the use of a number of exotic for us, but already familiar in the vocal world, effects: microphone, plucked instruments, synthesizer and harmonica. The voice is recorded by a special vocal server (based on Mac OS X and Windows). Vocals are processed in real time by an algorithm and presented as an mp3 file with the correct bitrate and normalization, so that, although a little, it "breathes". Able to compress up to 16 and bitrates in the range from 7 to 14.8 / 32. It is possible to use a plug-in for multi-channel recording of vocals and applying effects to it. The plugin extends the capabilities of Aurora Splinter Audio, making it even more flexible. Once installed, the plugin can be used as a standalone recording and effects plugin. Andrey and Pasha Parfenov present a new course "New Vocal Program". The course includes a complete vocal training course - from voice training to playing the... Every performer dreams of having a voice like Dima Bilan's. And it often happens that people who sing well because they have been practicing for a long time actually show ...
