Â· The Barrel â€" The Japanese Car- Â· Driving Test Simulator Â· Click Master Cenâ€¦This invention relates to miniature racing car toys and, more particularly, to a chassis and drive mechanisms for such a toy which will be capable of being driven automatically for a period of several hours. Heretofore, racing car toys such as those exemplified in the prior art and which have been sold under the trademark "Speedway" have been operated by a motor and a manual gearshift mechanism which shifted a transmission chain between a variety of gear ratios in a predetermined sequence. The degree of sophistication of these prior art toys is quite limited. Furthermore, once the gearshift is in a particular gear, it remains in that gear until it is shifted out of the circuit by the motor. Accordingly, it is the general object of the present invention to provide a miniature racing car toy having an automated drive mechanism. More specifically, it is an object of the invention to provide a toy which includes a new drive mechanism for electrically operated miniature racing cars which automatically shifts into a next gear when the motor is turned off. It is another object of the invention to provide such a toy which is designed to be of low cost. It is yet another object of the invention to provide such a toy which is of sturdy, reliable construction and which will stand substantial abuse during play. It is still another object of the invention to provide such a toy with an electric motor which can propel the racing car for an extended period of time without requiring that the car be manually shifted.Mozilla Foundation - Brand
