### What's New in the?

Numpad Mouse (Binaries) Identify Broken Hardware or Software Without Experiencing A Single Crash Numpad Mouse v1.8.0.1(3/28/13)  
Numpad Mouse creates a serial port connection to your computer, allowing you to identify broken hardware, such as RAM, processors, disks, controllers, and other electronics by simply plugging your device into the USB port. With a few quick clicks, you can instantly identify the problem, and log the results to your computer. You don't have to experience the hassle and frustration of a crash, and you don't need to risk your hardware, either. Numpad Mouse is a lightweight application, and it takes up very little space. Features: – Quickly identify broken hardware and software, without experiencing a single crash – Create a serial port connection to your computer – Configure your PC for easy troubleshooting – Quickly boot up your computer, and log information in no time at all – Choose the date and time the log is created to suit your needs – View detailed information for your problem, and go to the location for repair – View log data directly to your clipboard – Create a log folder for easier searching – Send the log to an FTP server to share it with others – Built-in logging system for ultimate protection – Support for mobile devices – Backup for 30 days, and your log data can be accessed at any time – No computer required, just plug in your device to your USB port – Audio is generated for users who might prefer to do things in silence – Creates a log for any hardware plugged into your USB port – Upload log information to your FTP server for sharing with others – View log data directly to your clipboard – Use log data on the web or through GDocs – Designed for Windows 2000, XP, 2003, Vista, and 7 – Compatible with most desktop USB ports – Configurable key mappings – Easy to install – Customizable with a few clicks – Active protection – No user interaction required If you have any issues with setting up Numpad Mouse, do not hesitate to contact us. Numpad Mouse User Guide (Required): – Download the Numpad Mouse User Guide – Extract the file – Open the file in a text editor and make sure the file is in the same directory as the application executable

---

## System Requirements:

Note: VCR-X is a standalone mod, meaning it does not require anything from The Legend of Zelda: Breath of the Wild. VCR-X is compatible with the New Nintendo 3DS and New Nintendo 3DS XL. VCR-X is designed to work best on the New Nintendo 3DS with a video recording slider to allow you to record TV shows, movies, and other media, and the ability to pause, play, and skip through VCR-X files. VCR-X will not work on the New Nintendo 3DS without this slider
