An intuitive and easy to use interface for managing documents. O3Spaces Workplace ready Compatibility with OpenOffice.org/StarOffice/MS Office The user interface of O3Spaces Workplace is based on OpenOffice.org. If you are using a different office suite, you can easily migrate your O3Spaces Workplace documents to your preferred office suite. O3Spaces Workplace is compatible with these document management solutions:Q: Accessing the Page.Title from Page_Load or ItemDataBound on a MasterPage (or Page) I have created a custom MasterPage using Sitefinity. I want to be able to add a code block to the page load, or the ItemDataBound of a ContentType to fill a HiddenField (data) with the current Page.Title. I am attempting this using a "data macro" on the MasterPage. Sitefinity generates this code: System.Web.UI.WebControls.Button btnApply = this.FindControl("btnApply") as System.Web.UI.WebControls.Button; if (btnApply != null) { Page.Title = "Updated"; btnApply.Attributes["data-control-value"] = this.Page.Title; } I can pass a value to the hidden field, but I can't find a way to get the CurrentPage.Title. A: I can't find a way to get the CurrentPage.Title. Well, if you use the standard master page of Sitefinity, and you have the Layout with Title, as the one shown below... ..you will find that the master page has a Page_Load method which will get you the title, in Sitefinity's "
