

Aspose.Slides For Java Crack + Download

Aspose.Slides is a java component to create, read, write and modify a PowerPoint document without using Microsoft PowerPoint. It supports PHP applications and provides all advanced features for managing presentations, slides, shapes, tables and supports PPT, POT, POS PowerPoint formats. Now you can add, copy, access, edit, clone and

---

delete slides in your presentations. It also supports audio & video frames, adding pictures, text frames and saving presentations as streams or SVG format. Aspose.Slides cannot only open PowerPoint files from different sources but it also allows you to save your presentations in a variety of ways. For example, you can save your presentation in not only PPT but also PDF format. Moreover, you can also save your slides as images. Aspose.Slides gives you almost all those features that you may or may not find in Microsoft PowerPoint. The versatility of

---

Aspose.Slides is that you cannot only add tables and different kinds of shapes to your slides but also different kinds of frames (that is text, audio & video frames). Aspose.Slides for Java Description Easy to use as it is powerful. It comes with a detailed documentation. There are many examples of creating and saving presentations. It is free There are many ways to save presentation It is also a powerful component to read, write, create and delete to A: I use Tom Musatti's aspose. There are many tutorial on the web:  
Downloading aspose A: EDIT: I

---

missed the fact that you said PHP, but to add on to @Ki and @Scott answer, i'll add a solution for PHP Also, as @M.H. and @Marko mentioned, I agree that Aspose has much more powerful components, but if you are looking for something quick and easy, I'd go with Aspose For PHP, here's a great tutorial by Dotnetkicks for example, to read the file as a stream

```
$doc = new Aspose.Slides.Document(ASPOFFICE_PRESENTS_FOLDER, $filename); $doc->Open(); // You can also do.SaveAs() and.SaveAsToStream() here's a list of Aspose's components You should try
```
